PROFESSIONAL SUMMARY

B.Tech CS student (Class of 2027) with hands-on experience in AI-powered and RAG applications, DevOps (CI/CD, Docker, AWS), and full-stack development. Proficient in Python, Java, Git, Linux, and Figma. Seeking a Software Engineering / Full-Stack Development internship to deliver high-impact, production-grade solutions.

EDUCATION

Bachelor of Technology (B.Tech) — [Specialization, e.g. Computer Science & Engineering]

Vishwakarma University, Pune | Expected Graduation: 2027 | CGPA: 7.78 / 10

TECHNICAL SKILLS

Languages: Python, Java

Web Development: HTML5, CSS3, Node.js

Databases: PostgreSQL, MongoDB, SQL, NoSQL

Tools & Version Control: Git, GitHub, Linux, Figma, OpenCode, Docker, Kubernetes

PROJECTS

FlavorInsight — Local AI review analyzer (Shipped)

- Built a locally-run AI application that analyzes product and customer reviews entirely on-device, without relying on cloud-based APIs.
- Applied natural language processing techniques to extract sentiment, key themes, and actionable insights from unstructured review text.
- Designed the pipeline with a privacy-first approach, keeping all review data and processing local to the user's machine.

INTutGPT — RAG-based textbook platform (In Progress)

- Building a Retrieval-Augmented Generation platform that lets students query textbook content and receive grounded, contextual answers.
- Implementing a document ingestion and chunking pipeline with vector embeddings to enable accurate retrieval over textbook material.
- Integrating an LLM with a vector database to ground responses in source content and reduce hallucination.

WORK EXPERIENCE

DevOps Intern — Edufyi Tech Solutions (Remote) | [In Progress]

- Learned and applied Git/GitHub workflows for version control, branching, and team collaboration.
- Learned to build and manage CI/CD pipelines, and worked with Docker to containerize and deploy applications.
- Explored cloud infrastructure fundamentals (AWS) for provisioning, configuring, and managing environments.

Data Science Intern Training — Teachnook (Remote) | 2024

- Gained hands-on experience in statistics, Python, and data visualization for data analysis.
- Applied analytical methods to derive insights from real-world datasets.
- Built a foundation in data-driven problem-solving and exploratory data analysis.

CERTIFICATIONS

- Introduction to Cloud Computing — NASSCOM, Skill Development Program (Mar 2026)
- Communication Foundations — LinkedIn Learning, PMI® Registered Education Provider (Jan 2025)
- Intelligent Automation for Project Managers — LinkedIn Learning, PMI® Registered Education Provider (Jan 2025)
- Managing Multiple Projects — LinkedIn Learning (Jan 2025)

ACHIEVEMENTS

- Selected participant, Techathon 3.0 (2026) — a National-Level Technology & Innovation Competition organized by the Innovation Foundation, Pune.

POSITIONS OF RESPONSIBILITY & EXTRACURRICULARS

- Management Team Member, Next Gen AI Club — Assisted in organizing and managing club events and activities, contributing to community engagement and smooth event execution.
